

Green Energy Awards: Photo of the Year Competition

Top Tips

1. Submit only your very best images.
2. Look for new and interesting angles for originality.
3. Let friends and/or colleagues comment on your images, get a second opinion.
4. Read the description and view the mood board carefully.
5. Describe your photo in a caption. (approximately 50 words)
6. The best photos are simple and uncluttered.
7. Read the [Terms & Conditions](#)
8. Remember, a picture paints a thousand words.

Mood Table

These are a few examples of photos taken in the past which help show sustainable energy solutions with human aspects behind them.

Category Description

Regen South West is looking for images that capture not only sustainable energy solutions in the south west region but also the human elements that encapsulate them.

More and more we see renewable resources, energy saving schemes, and sustainable energy production around us. These can range from solar panels and wood fuel burners to energy saving devices and large wind farms.

All images must have a short caption describing the image, including the location and are only accepted if in the south west of England.
